

LOOKING BACK

We've been racing
for over **50** years.

This is our tradition that has been passed on from generation to generation. We have raced everything:

STOCKERS

BRACKET CARS

STREET CARS

FAST FORDS

SUPER CLASSES

PRO MODS &

NITRO FUNNY CARS;

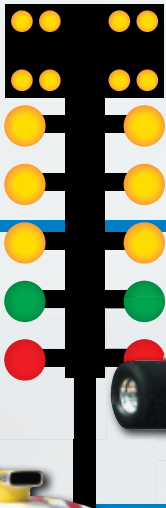

and we have the world championships to prove it.

The technician building your valve body, the warehouse staff packing your order and the specialist selecting your custom torque converter, were not on the golf course last weekend, we were at the racetrack. We are men and women just like you.

WE LOVE RACING!

WE ARE RACERS.

We understand it is important to make your vehicle fast and consistent. We know the troubles or headaches that can happen during a drag race. We put this knowledge back into everything we do, from our product design to our customer service. You need your parts and supplies by Friday, and we will do everything we can to make sure you don't miss your race weekend.

MOVING FORWARD

We are committed to the sport of racing.

BTE and Memphis Performance are committed to supporting you and the sport of racing into the future. No more will we rely on junk and salvage yards to supply you with racing parts as our competitors still do. Products must be new, affordable, reliable and designed specifically for high performance. The new racing parts we will continue to develop and release in the future, such as our all new transmission valve bodies, pumps, 8" torque converters and other components will reflect this philosophy. BTE and Memphis Performance will be here to support and work with you as we all continue the racing tradition.
